PROFESSIONAL SUMMARY

Results-driven Project Management & Business Strategy professional with 14+ years of experience across international prefabrication piping, EPC, industrial manufacturing, and government-scale programs. Proven record delivering 11+ high-value piping and export projects worth THB 1Bn+ across Asia-Pacific, the Americas, and Africa. Skilled in end-to-end project lifecycle management, ERP-driven reporting, commercial strategy, and cross-functional stakeholder leadership, with hands-on proficiency in Power BI, Tableau, SQL, and AI-assisted productivity tools (Claude, ChatGPT) to drive delivery excellence, cost optimization, and digital transformation.

KEY ACHIEVEMENTS

- Delivered 11+ international EPC/piping export projects worth THB 1Bn+ across Asia-Pacific, the Americas, and Africa, including the 8,000 MT Tilenga Upstream Facilities program, the largest in scope to date.
- Progressed from Project Analyst to Manager, Project Management & Business Strategy over 14+ years, leading cross-functional teams spanning engineering, procurement, QA/QC, logistics, and finance.
- Digitized planning and reporting workflows by migrating manual processes to ERP/database-driven systems (MS Dynamics NAV), improving reporting accuracy and turnaround time.
- Built and deployed internal engineering utilities, including a spool material-matching automation tool and a browser-based OCR document digitizer, to streamline BOM/stock reconciliation.
- Delivered 300+ hours of structured field-supervisor training under a national government nutrition program (ISSNIP), strengthening frontline program execution.

CORE COMPETENCIES

- Project Planning, Scheduling & Controls (L1/L2, Earned Value Management, Milestone Tracking)
- Commercial & Contract Management, Budgeting, Cost Optimization
- Quantity Surveying (BOQ / BOM / MTO) & Final Accounts
- ERP & Digital Transformation (MS Dynamics NAV)
- Data Analytics & Business Intelligence Reporting
- Procurement, Vendor Negotiation & Supply Chain Coordination
- Client, Consultant & Stakeholder Management
- Risk Management & Process Improvement
- Cross-functional Team Leadership & Coaching

TECHNICAL SKILLS

ERP: MS Dynamics NAV | Data & BI: Power BI, Tableau, SQL, Advanced Excel | AI Tools: Claude, ChatGPT | Version Control: GitHub

PROFESSIONAL EXPERIENCE

DEE Piping Systems (Thailand) Co., Ltd., Chachoengsao, Thailand

Sep 2018 – Present

Manager, Project Management & Business Strategy

- Lead end-to-end delivery of prefabricated piping export projects valued at ~THB 1Bn, owning scope, schedule, cost, and quality across the full project lifecycle.
- Directed 11+ EPC/export projects across Asia-Pacific, the Americas, and Africa, including the current 8,000 MT Tilenga Upstream Facilities program.
- Own L1/L2 scheduling, monthly progress reporting, milestone tracking, and earned value analysis to keep multi-million-dollar programs on time and on budget.
- Partner with Engineering, Procurement, PPC, QA/QC, Logistics, and Finance to align cross-functional delivery and remove bottlenecks.
- Serve as primary client interface for technical clarifications, deviations, concessions, and PO amendments via client portals, strengthening stakeholder trust.
- Finalize BOM, reconcile MTO vs ISO, and drive material planning and inventory trend analysis using MS Dynamics NAV ERP.

- Manage export documentation (Commercial Invoices, Packing Lists, COO, B/L), ensuring full compliance and on-time shipment.
- Spearheaded digital transformation initiatives (barcoding, online DMS, custom ERP reporting), migrating manual planning to database-driven systems.
- Lead weekly cross-functional reviews and time-study-based budgeting to eliminate bottlenecks and lift throughput and productivity.

Key Projects Delivered:

Project	Scope (MT)	Period
Tilenga Project - Upstream Facilities	8,000	Jul '23 - Ongoing
Bacalhau FPSO Project	750	May '22 - Dec '22
Fifth Transmission Pipeline - Phase II	1,605	Jan '20 - Sep '20
Tanjung Jati (Unit 5 & 6)	1,200	Mar '19 - Dec '19

Additional projects delivered: IRPC CHP III, Saha Cogen, Arroyo Seco, Dangote, Manzanillo, Bundled Phase 3 Wellhead Platforms, and Fifth Transmission Pipeline Phase III.

Tata Trusts, Varanasi, India

May 2018 – Aug 2018

District Project Lead, National Nutrition Mission

- Served as single point of contact between Government bodies, NGOs, and consultants for large-scale nutrition and health outreach programs.
- Supported execution of district-level social programs including nutrition distribution, health tracking, and community outreach initiatives.
- Conducted inter-departmental reviews, progress monitoring, and escalation management to keep program milestones on track.
- Delivered 300+ man-hours of structured training to field supervisors under ISSNIP (Integrated Systems Strengthening and Service Improvement Project), building frontline execution capability.

DEE Development Engineers Ltd., Faridabad, India

Aug 2012 – Apr 2018

Senior Engineer, Project Analyst

- Managed techno-commercial coordination with clients and consultants across engineering and manufacturing workflows.
- Developed MIS dashboards and reports used by senior management for data-driven decision-making.
- Supported company-wide annual budgeting, dispatch planning, inspections, and billing processes.
- Played a key role in ERP (MS Dynamics) process design, barcode integration, and Document Management System (DMS) implementation.
- Conducted organization-wide training on ERP, barcode systems, and reporting tools, improving digital adoption across teams.

TECHNICAL PROJECTS (GITHUB)

Personal projects conceptualized and built independently, showcasing applied programming and AI-assisted development skills alongside project management expertise.

- **Live Spool Status & Ageing System (Python, Pandas, JavaScript, Chart.js)**. Flagship project, fully conceptualized and built end-to-end using AI-assisted development tools: a production intelligence system that automatically reads and validates fabrication and planning Excel data, applies business rules to merge it into a master spool dataset, and calculates real-time stage-wise ageing and KPIs. Auto-refreshes and publishes to a live web dashboard, replacing manual spreadsheet tracking and cutting the lead time to detect production bottlenecks and delays.
- **Spool Material-Matching Tool** (JavaScript). Web app automating BOM-to-stock matching across multi-project piping spools, with priority-, weight-, and diameter-based allocation logic and Excel-exportable fabrication-readiness reports.
- **PDF-to-Text OCR App** (HTML/CSS/JS). Browser-based OCR utility converting scanned PDF documents to editable text, with no server-side processing required.
- **ThaiSource Pro** (TypeScript, Next.js, PostgreSQL, Prisma). Backend for a B2B industrial procurement marketplace, with vendor management, RFQ/quotation workflows, and admin moderation.

EDUCATION

Bachelor of Technology, Mechanical Engineering | BSAITM, Faridabad | 2012
